Checking readiness of Central regional center of Emergency Ministry

A command staff exercise: “Work of Main Offices of the Russian Emergencies Ministry in the subjects of the Russian Federation in governing forces and equipment during response to natural and industrial disasters” is taking place in the Central regional center of the Russian Emergencies Ministry from 19 to 21 November 2013 in accordance with the plane of main activities of the Central regional center.

The exercise involves administration of the regional center, Crisis Management Center of the Central regional center, Main Office of the Ministry in the subjects of the Central Federal District, as well as representatives of control bodies of territorial and functional subsystems of the Russian Disaster Management Commission, dispatch services of the executive authorities in the subjects of the Russian Federation, territorial bodies of federal executive authorities, single dispatch service in municipalities, dispatch services in organizations.

There will be three stages in the exercise. Today at the first stage the participants are practicing activation of “emergency situation” mode. Under the command from the regional center the operations center is organized in the main offices and mobile control centers are sent to the areas of simulated emergencies. In accordance with the incoming instructions the participants estimate the situation brought in by a simulated emergency situation, forecast its aftermath and scale and take measures to respond to it.

After the first day of the exercise each of 17 Main Offices of the Russian Emergencies Ministry will get a rating for estimations and efficiency of response to the incoming instructions. After correction work the participants will start the second stage of the exercise tomorrow at 08:00 AM.
