Emergency Ministry confirms verifies of its Twitter account

Microblog of the Russian Emergencies Ministry was one of the first of Russian ministries, which has verified its authenticity. Accounts of PM Dmitry Medvedev, RF Government and General Prosecutor's Office were verified earlier.

The Emergency Ministry's accounts in social networks allow enhancing efficiency of interaction with Internet users, and become one more operational and authentic source of information from the Russian Emergencies Ministry.

The obvious advantage of the Emergencies Ministry's microblog in Twitter is simplicity and speed of getting important information about the activity of the Ministry, emergency situations, fires and forecasts.
