Command staff exercise start in Tver

Главное управление МЧС России по Тверской области

Command staff exercises started today in the Main Office of the Russian Emergencies Ministry in Tver Region. Under the leadership of the Central regional center of the Russian Emergencies Ministry rescuers will practice governing forces and equipment in response operations to natural and industrial disasters.

The scenario provides such emergency situations as an explosion of gas-main pipeline, spill of ammonia, major road traffic accident, gas explosion, oil spill and a plane crash. The emergency operations center has been set up in the Main Office of the Ministry in Tver Region to practice theoretical and practical sections of the exercises and a mobile control center will be deployed at the scenes of the simulated emergencies.

Command staff exercises will last till 21 November.
