

The Ministry of the Russian Federation for Civil Defence, Emergencies and Elimination
of Consequences of Natural Disasters

21.12.2019 22:12

Daily operational forecast for December 22, 2019

The operational forecast of possible emergencies on December 22, 2019 in the territory of the Russian Federation is due to the passage of 4 cyclones, 3 anticyclones and the action of atmospheric fronts.

On the territory of the Russian Federation, emergency situations caused by dangerous and adverse meteorological phenomena are not predicted.

Probability forecasting:

failure of people and equipment under the ice on the water bodies of the Far Eastern, Siberian, Ural, Volga, Northwestern and Central Federal districts;

activation of exogenous-dynamic processes in the mountainous regions of the North-Caucasian Federal district.

The information was prepared based on the data of the Hydrometeorological Center of Russia and the All-Russian Research Institute of Civil Defence and Emergencies (FC).
