EMERCOM of Russia and Rosstandart signed a cooperation agreement

**МЧС
РОССИИ**

The agreement signed by the Minister of EMERCOM of Russia Evgeniy Zinichev and the Head of Rosstandart (the Federal Agency for Technical Regulation and Metrology) Anton Shalaev is intended to help prevent violations of legislation in the field of technical regulation, standardization and conformity assessment in the field of civil defense, public protection and fire safety. The parties have planned joint training of specialists of the metrological services of the EMERCOM of Russia.

Specialists of the EMERCOM of Russia and subordinate organizations are actively involved in standardization work - for example, the Ministry's heads the technical committees for standardization No. 071 "Civil Defense, Prevention and Response to Emergencies" (TC 071) and No. 274 "Fire Safety" (TC 274), with In this case, the chairmen of the TC in both cases are the supervising deputy ministers. In 2020, the Russian Emergencies Ministry and Rosstandart approved a Perspective Standardization Program in the field of civil defense, protection of the population and territories from natural and man-made emergencies until 2025.

Also, as a result of joint work, a unified mechanism for harmonizing the National Certification System with the Voluntary Certification System of emergency rescue equipment of the Ministry of Emergencies of Russia will be formed. It is expected that this will strengthen the competitive position of Russian enterprises in the fire and rescue industry and improve the profile testing base.
