**Sevastopol Fire and Rescue Garrison extinguished a simulated fire at the
Lunacharsky Theater**

Large-scale firefighting and tactical trainings took place in Sevastopol, in which a significant part of the forces and means of the territorial firefighting and rescue garrison was involved. The action took place at one of the most significant and large city cultural facilities: in the building of the Anatoly Lunacharsky Sevastopol Academic Russian Drama Theater.

According to legend, a short circuit occurred, which caused a fire on the stage. The personnel carried out the evacuation of people from the premises of the theater and transmitted information about the incident to the number "101". In addition, before the arrival of the firefighters, a power outage was carried out and the stage portal was limited by a fire curtain, an internal extinguishing system was activated. However, the fire spread throughout the stage space, the area of the fire reached 120 square meters.

The subdivisions arrived at the scene as soon as possible and entered the premises of the theater. During the reconnaissance, EMERCOM officers found and rescued 4 conditional victims. The trunks were promptly submitted for extinguishing.

During the exercises, the issues of safe evacuation of citizens, extinguishing, interaction between all services and departments - traffic police, disaster medicine and others were worked out.
