**In the village of Zarechny, Transbaikal Territory, EMERCOM rescuers provide  
assistance to residents of flooded houses**

**МЧС  
РОССИИ**

As a result of heavy rainfall in the Nerchinsky district, the coastline was washed out on the artificial lake Makarych. In the settlement of Zarechny, 55 houses and 55 household plots were flooded. Residents of the flooded houses were evacuated to a temporary accommodation center.

At the moment, the water level has dropped by more than one meter, 46 houses have been completely freed from the water. 9 houses remain flooded. The decline in water continues, the situation is stabilizing. There are no people in temporary accommodation centers.

At the scene, employees of the fire and rescue garrisons of Nerchinsky and Baleisky continue to work. They provide targeted assistance to the residents of the village: they help in evacuating household items to dry places, disconnecting household electrical appliances in flooded houses, clearing areas of debris, knocked down fences. Also, the supply of drinking water to the population is organized.
