**A large-scale inspection of public notification systems will take place in the
regions of the Russian Federation**

On October 6, comprehensive checks of the readiness of public notification systems at the regional and municipal levels will be carried out in all regions of the country.

From 10.40 local time, it is planned to send a signal "ATTENTION TO EVERYONE!" by launching electric sirens and loudspeakers, and replace the all-Russian public television and radio channels (up to 1 min).

The purpose of the inspections is to work out timely communication to the population of signals and information about possible dangers in the event of a threat or emergency situations of a natural and man-made nature.

The Ministry of Emergency Situations of Russia appeals to citizens to remain calm. The audio signaling and the replacement of the television are planned.

This year, similar inspections have already taken place on March 3.
